WALTER COPE MDCCCLX-MCMII

TO THE MEMORY OF A MAN OF
THE HIGHEST PERSONAL CHARAC-
TER AN ARCHITECT OF WONDER-
FUL ENERGY AND STRENGTH
LOYAL TO HIS PROFESSION AND
EVER READY TO HELP ITS
YOUNGER MEMBERS AND BE TO
THEM A STAUNCH, RELIABLE
FRIEND

THE T SQUARE CLUB
DEDICATES THIS VOLUME

Since the last exhibition catalogue was laid before our members and the public who are interested in the work of the T Square Club, we have lost by the sudden death of Walter Cope, one of the Club's original promoters, whose interest in its success never flagged, but who, even in the press of professional duties of his exceptionally busy life, found time to give to its work his close personal attention, and one who apparently derived great pleasure from furthering its interests and extending its influence. He always upheld it as the best possible means of creating and fostering pleasant and profitably personal relations between architects and their draughtsmen because he believed that the Club furnished an opportunity for the meeting of the senior members of the profession with their juniors, freed from the restraint of professional relationship; and he believed that both classes might profit by the serious criticism of the problems presented, and also by the relaxation of social meetings enlivened by song and wholesome merriment.

It was to his juniors a privilege ever to be remembered, to come into close personal contact with one who filled so deservedly a large space in the architectural life of this community. Here at the Club many of us first learned the secret of his success, first realized in his hours of relaxation his wonderful personal attraction, and saw in it, coupled with his indomitable energy, the union necessary to achieve the reputation in his profession which he so quickly won, and which every year of his life he made more secure.

To some of our older members was given the privilege of his friendship during the character-forming period of life, and those recall with pleasure and interest his boyhood at the old family seat at "Aubury," in Germantown. Here, amidst the natural charms and beauties of an extensive country estate, his home embowered in a fine wood, with a fair open country on every side, he learned his loyal love for Nature, and formed so great an attachment to the art of landscape gardening, that early in his career he found it difficult to decide whether he should take it or architecture for his life work. Here, too, he educated his hand and eye to laborious and exact industry, spending many hours in his small carpenter shop, never idling or dawdling over his work, but ever with definite purpose and method, carrying out some well-considered plan, and rejoicing over the completion of carefully designed and executed work. Rarely does a boy's early bent foreshadow so well his after-career, and seldom do the traits of character which manhood is to develop and mature appear so early and continue to grow with such steadiness as they did in the case of Walter Cope.

His early distress that any of his work should be "out of line" became in the man a determination that everything that was delineated by him, or for which he was responsible, should be "in drawing," and that even sketched work should be truly in perspective. The energy and application of the boy developed into the determined purpose of the man that in himself or in those under his direction there should be no half-hearted interest, but that the head should ever lead so thoroughly that the hand could follow with sure strokes which should need no retouching.

Yet his love of what was practical and thorough was combined in a rare degree with the true artistic sense. Was a vista to be opened through an overgrown thicket the superfluous shrubbery must be carefully trimmed out, but the main end was to produce an effect; some distant view must be revealed; some fine contrast of dark alleys leading to sunny glades, or to a view over peaceful waters, or to possible fine sky effects, must be the object which justified the labor.

His early hesitation between gardening and architecture resulted in this, that while his life was devoted chiefly to the latter, he was always happy when he could combine with building the development of landscape effects, and we well remember how he delighted that the noble group of buildings which he designed for the Washington University in St. Louis should be set in grounds so spacious and with such beautiful possibilities of planting.

When his early studies were completed Mr. Cope had the opportunity to carry his preparation farther in an extended tour of Europe. The amount of work which he did at that time is attested by the sketches which still remain. We see in them the exactness of observation, the accurate grasping of form and the brilliancy of touch which characterized all his work, and we recognize the wonderful mastery of the pencil which ever remained the distinguishing mark of his sketching. Few men have so profited by the training of the Academy schools as to acquire at once the confidence which this early work displays, and in fewer still has the confidence been justified by the result produced.

He made special and loving studies of the English Cathedral towns, and developed there an appreciation for Gothic architecture which only deepened with his advancing years. He felt the charm of rural France, and lingered long in Ronen, where, as his sketches show, he acquainted himself thoroughly with the architecture of that picturesque Norman town.

Rome, Greece and Constantinople were laid under contribution, and among all that remains to show how earnestly he worked during his tour it is remarkable how strongly he felt his true tool was the pencil, and how little he produced in color. His power of correctly depicting detail by the slightest indication and his accuracy of drawing are among the strongest traits of his early work.

Soon after his return to America Mr. Cope joined forces with a man equally gifted with himself, John Stewardson, one of the friends of his boyhood, thus creating the firm which holds now so honorable and well-merited a place in the esteem of the profession and the public. This period dates also the commencement of his active association with the T Square Club, at the organization meeting of which he presided. He was several years its President or a member of its Executive Committee. The Club's problems he followed with loyal and hearty interest even after absorption in his professional career lessened the time which he could devote to it.

The summer of 1889 saw him touring through Normandy with his congenial and gifted friend, Edmund Stewardson, the sculptor. Charming way-side sketches of churches, barns and other rural architecture remain as souvenirs of this vacation, and his studies of the possibilities of Norman domestic work bore fruit later in America in his designs of country houses.

But his finest and ripest sketches were the result of his journey through

Spain in the Spring of 1895. These show wonderful mastery of style and prove that in the handling of his pencil he had "arrived."

His mind, ever ready to receive new impressions, seems from the first to have been stimulated by the treasures in architecture which the comparative inaccessibility of Spain had hidden from the knowledge of the world, and with characteristic energy he threw himself into the work of fixing on paper the most striking of his finds. His work bubbles over with enthusiasm which afterwards showed itself in speech whenever he recounted the discoveries he made in his Spanish travels.

We can see with what delight he worked before the choir gates in the Cathedral at Burges, how he enjoyed the suggestion of detail and the arrangement of light and shade; we can picture him roaming over the hills of Toledo, or searching with eagerness the narrow streets of Salamanca. He never excelled in touch the sketches done in these journeys, and in looking over his foreign work we do not need to be told that those which he made in Spain gave him the greatest pleasure. His early studies, good as they are, seem but careful sketching when compared to these which he produced under bright Spanish skies, and which are redolent of sunny life, telling eloquently of the worker's joy.

But slight mention has been made of the achievements by which Walter Cope will be best remembered in the land of his birth, which he has done so much to beautify. We have chosen in this brief tribute to his memory rather to dwell on his personal traits. Our association with him in this Club was personal rather than official, and we wish to recall what he was to us and to profit by the inspiration of his example. Therefore we have dwelt on his sketches more than on his architectural productions. Professional work is limited and bounded by existing influences of condition and clientage. Sketches are oftener the production of moments when one feels freedom from care, and work which has been done with the heart, in times of comparative leisure, is more illuminative as to the character of the artist.

Walter Cope has been taken from our circle suddenly and with little warning, but we still have his splendid example. Let us from it learn to labor earnestly and faithfully in our chosen vocation, never satisfied with less than the best we may attain, and let those of us who may be privileged to climb, remember always to hold out, as he did, a hand of cheer and help to those who are younger students of architecture and younger members of the T Square Club.

ACKNOWLEDGMENTS

THE T SQUARE CLUB DESIRES HERE TO RECORD ITS SENSE OF INDEBTEDNESS TO THOSE ARCHITECTS AND ALLIED ARTISTS WHO, BY GENEROUS CONTRIBUTIONS OF THEIR WORKS YEAR AFTER YEAR, MAKE POSSIBLE THESE EXHIBITIONS, AND THEREBY LEND THEIR AID TO A POTENT FACTOR IN THE ENCOURAGEMENT OF ARTISTIC EXCELLENCE AND POPULAR APPRECIATION; ALSO TO THE ART CLUB FOR THEIR COURTESY IN EXTENDING THE USE OF THEIR GALLERY FOR THE PURPOSES OF THE EXHIBITION, AND TO MR. EARL STETSON CRAWFORD FOR HIS CONTRIBUTION OF THE COVER DESIGN OF THIS BOOK.

TO THE ADVERTISERS, THE OFFICERS AND MEMBERS OF THE T SQUARE CLUB DESIRE TO EXPRESS THEIR APPRECIATION OF THE LIBERAL SUPPORT WHICH HAS GONE FAR TOWARD MAKING THE PUBLICATION OF THE CATALOGUE POSSIBLE.

ANNOUNCEMENTS

A NUMBER OF THESE BOOKS ARE RETAINED FOR SALE, AND WILL BE FORWARDED, POST PAID, UPON RECEIPT OF SEVENTY CENTS.

CATALOGUES OF PREVIOUS YEARS CAN BE SUPPLIED IN LIMITED NUMBERS AT THE FOLLOWING RATES, POST PAID.

1897-98	PAPER COVER	\$1.00
1898-99	" "	1.00
1899-1900	CLOTH	1.25
1900-1901	" "	.75
1901-1902	" "	.75

THE PLATES USED IN THE ILLUSTRATION OF THIS BOOK ARE PLACED AT THE DISPOSAL OF THE VARIOUS CONTRIBUTORS, WHO MAY OBTAIN THEM BY COMMUNICATING WITH THE SECRETARY, AND PREPAYING CHARGES FOR CARRIAGE.

“ I N R E V I E W ”

THIS Catalogue of the Exhibition is presented believing that it will be found of interest not only to the Architectural profession and the technical journals, but to the art-loving public as well. That the book will be judged only in a friendly spirit of consideration is assumed, since it is the production of those necessarily unpracticed in the technicalities of publication, whose time is largely limited by the demands of active business.

The numerous printed criticisms and reviews of former books have been appreciated. Whether favorable or adverse in nature, they have been laden with suggestions, which, embodied in later works where possible, have tended to a constant improvement in the effectiveness of the book as a resumé of things architectural for the year.

In retrospect one sees certain important events which differentiate themselves from the even trend of things, some of which it is intended to mention here. First of these, in point of time, is the Competition for the Soldiers' and Sailors' Monument. During the early spring the City of Philadelphia appropriated a sum of money to defray the expense incident to securing plans, and at the same time a suitable plot of ground in the center of Logan Square was set aside for that specific use. A committee, appointed conjointly by the T Square Club and the local Chapter of the Institute, to act in an advisory capacity, was entrusted to draw up a Programme of Competition, to name the judges and to aid in directing the general execution of the scheme. This committee carried the work to a successful conclusion, though in commenting on the outcome of the Competition it must be noted with regret that the names of Philadelphia architects of prominence are lacking from the list of some sixty competitors.

SOLDIERS'
AND SAIL-
ORS' MONU-
MENT COM-
PETITION

Though the prizes offered were all taken from Philadelphia, the city is to be congratulated that, when the recommendation of Councils is carried out, the work is to be entrusted to a firm so well equipped to assure a worthy and fitting memorial to the Soldiers, Sailors and Marines who served in the War for the Suppression of the Rebellion.

Not more than ten years ago training in design was to be had in but two ways, either by participating in the strong series of Competitions maintained by the T Square Club, or by study at the then robust infant Architectural School of the University of Pennsylvania. Since that time numerous courses for both day and night classes have been offered by various schools, the most recent being that of the Pennsylvania Academy of the Fine Arts. Under the direction of its well-organized corps of instructors it has been inaugurated most auspiciously, and results of exceptional merit are to be looked for, since the pupils of its first class have been chosen from among men well advanced in technical training. The prescribed courses are of a broad and comprehensive nature, giving due recognition to those arts which closely ally themselves with Architecture.

With the new School there is founded another free Scholarship affording to its beneficiary three years of study abroad ; in both its endowment and administration the most liberal yet established in America. The prize is offered to that member of the Academy Class who shall, by the year's work, best demonstrate to the faculty his fitness and worthiness. This recognized importance of continued excellence in distinction to spasmodic effort, is to be commended, since individual temperament often handicaps the most able men working under the nervous pressure of competition.

The founding of the Academy School and its Scholarships has in some measure effected the work in design outlined by the T Square Club, which has this year assumed a two-fold nature. For the nineteenth consecutive year the series of regular

monthly Competitions continues, but in lieu of the Club Scholarship of the last three years, two prizes will be awarded. The first admits its winner to the Academy School without entrance examination, pays the expenses of tuition, etc., for the course, and thereby opens the way to a prize of far greater value than it is in the power of the Club to offer. The second prize, applied in the same way, will be of material value. The winner of either has the option of receiving the equivalent of his prize in money or Architectural books of his choice.

A popular innovation is the Sketch Class, meeting frequently for work in the solution of rapid design problems. A number of the stronger men are finding this work of utmost value to develop directness of thought and facility of indication. To Mr. Paul A. Davis, 3d, who has this Class in charge, the Club is very deeply indebted.

The work of the Club, if it be worthy of recognition at all, must necessarily be larger, broader, more comprehensive than the Competitions which it holds. These are but incidents, participated in by the few—not the many—and are often looked upon merely as providing occasions for feats of draftsmanship. Be this as it may, however, there has been a degree of excellence attained in the drawings in last year's contests which deserves especial comment here. The series of subjects, each pertaining to some phase of street embellishment, possess vital, present interest. In each instance notably mature, "arrived" solutions, well presented, were handed in. Judging by their work Messrs. Leisenring, third winner of the Club Scholarship, Poggi and Richards, very close second and third competitors, have set a standard of design which the Club will do well to sustain.

Apropos of Classes, the time seems to have come when consideration must be given to the pertinent question, whether or not, in view of the increased number of well-equipped schools, the legitimate direction for club education work is not

CLASS

BOULEVARD
SERIES OF
COMPETI-
TIONS

IMPROVE-
MENT IN
PUBLIC
UTILITIES

in the fields of craftsmanship and materials as related to Architecture.

In the awakening, manifest generally throughout the country, as to the important bearing of material conditions upon civic development, Philadelphia has recognized the relative importance of great public utilities, especially those of a sanitary nature. First thought has wisely been turned toward the important question of water supply. The city's immense filtration system, designed to ensure a clear, pure supply, ample for all needs of the present and the near future, is already operating in part and will within a short time be an accomplished fact. Meanwhile the constant, reiterating prominence given in both official circles and the public press, justifies the belief that the immediate future is to see great activity in the direction of providing modern, safe and sanitary establishments for the Municipal Institutions which care for the city's sick, insane and poor.

THE CITY
BEAUTIFUL

Still another urgently-needed improvement, "The City Beautiful" will, there is sufficient reason to believe, soon become the subject of official sanction, it being confidently hoped that the present administration will take the important step of placing on the city's plans the proposed Boulevard, or Parkway, from the City Hall to Fairmount Park. This movement has repeatedly been endorsed by the T Square Club, and other societies, and the culmination has been reached by the formation of the Parkway Association. In the recent "Parkway" publication, the Hon. James M. Beck says, in part, "The Boulevard project will not die. Its vitality is due to its inherent worth. Excepting the improvement of our water supply . . . it may be questioned whether there is any project which means so much to the welfare and advancement of Philadelphia as the construction of this Boulevard. To keep pace with its many rivals, and especially to pass them, it is necessary that a city should be made attractive . . .

having some distinct features of exceptional beauty, of which its people may justly boast, and with which it may attract strangers within its gates. In this sense beauty is not a luxury, but a vital necessity. . . . Apart from the pleasure of our own people Philadelphia should attract the attention of the world most by having some great distinctive thoroughfare, which will yield to none in beauty. . . . To construct it before it is too late is the plainest dictate of prudence and wisdom. To neglect it would be immeasurable folly, for which future generations would hold the present justly accountable.

THE
PARKWAY
BOULE-
VARD

. . . If Philadelphia, the eighth city in the world, confesses itself unequal to this splendid project, it will admit that it has no just place among the leading cities of the modern world.

Buigos. May 25. 91

CHURCH AT MOLENTLE.
July 13. 1888

INDEX OF EXHIBITS

ALLEN, FRANCIS R.—220 Devonshire Street, Boston, Mass.

- 1 Library Interior—House of Richard P. Marvin, Esq., Akron, Ohio.
- 2 "Sonnenberg"—Residence of Mrs. F. F. Thompson, Canandaigua, New York.

BAILEY & TRUSCOTT.—421 Chestnut Street, Philadelphia.

- 3 Campanile—Church of St. Elizabeth, Sixteenth and Mifflin Streets, Philadelphia.

BEEZER BROS.—601 Vilsack Building, Pittsburgh, Pa.

- 4 Country House at Ebensburg, Pa.
- 5 Residence for Mr. Thomas Lynch.

BOYD, DAVID KNICKERBACKER.—Harrison Building, Philadelphia.

- 6 Residence of Arthur P. Baugh, Esq., Wynnewood. (Photographs.)
- 7 Residence of Arthur P. Baugh, Esq., Wynnewood. (Perspective.)
- 8 Residence of Wm. Henry Sayen, Esq., Wayne, Pa. (Photographs.)
- 9 Residence No. 810 Pine Street, Philadelphia. (Photographs.)
- 10 Sketch for a Suburban House.

THE NAME "Standard"

Is Cast in Relief on Every Piece of the PORCELAIN ENAMELED WARE

THAT HAS RECEIVED THE HIGHEST AWARDS
AT ALL WORLD'S FAIRS AND EXPOSITIONS

The Guarantee which this name carries with it is absolute and a perfect assurance against the annoyances inseparable from the use of inferior and non-guaranteed brands. It is essential to perfect sanitation that all sanitary equipment, such as lavatories, water-closets, etc., have a surface that is hard, smooth and perfectly non-absorbent.

"Standard" Porcelain Enamel provides these features in the highest possible degree, combining the daintiness and purity of China with the strength and durability of iron.

PLATE 1035 G

BOOK OF MODERN BATH ROOMS, showing various designs of interiors, equipment and arrangement, with prices, etc., sent free on application.

PLATE 1036 G

"Standard" Porcelain Enameled Lavatories comprise a full line of new patterns that are graceful in design and beautiful in finish, as well as practically adapted to the purpose for which they are intended.

Good Painting at the Present Day is Impossible Without
ZINC WHITE

ERNEST FLAGG, Architect
No. 35 Wall Street, New York

January 20, 1902.

THE NEW JERSEY ZINC COMPANY,
11 Broadway, City.

Gentlemen :

Replying to yours of January 2d, would say that I am familiar with Zinc White, and have often used it. I am also in the habit of specifying it in combination with white lead where the nature of the work so requires.

You say, "Our broad claim is that good painting at the present day is impossible without Zinc White." I am inclined to think this is true.

Yours truly,
(Signed) ERNEST FLAGG.

Information regarding Zinc White is contained in our practical pamphlets:—
"Paints in Architecture;" "The Paint Question;" "French Government
Decrees;" "Specifications for Architects."—Free to any address.

New Jersey Zinc Company
No. 11 Broadway, New York

HORTICULTURAL BUILDING IN THE NEW YORK BOTANICAL GARDEN, BRONX PARK, NEW YORK CITY.
Designed by Lord & Burnham Company.

THIS building has been erected with our patented construction in accordance with plans, details and specifications furnished by us and under our superintendence. Now that the final wings are added in accordance with our original design it is one of the most important Horticultural Buildings in the world.

We are constantly erecting

Fine Conservatories

from special designs, on large private estates all over the country, in public gardens and parks, and in connection with large city residences.

We particularly desire the opportunity to work up sketches and estimates from suggestions of architects.

Book of illustrations sent on application.

American Tin Plate Company

BATTERY PARK BUILDING, NEW YORK

The sole owner of the "MF" brand and MF process of making terne plates (Roofing Tin)

The MF process of manufacturing roofing tin originated in South Wales two generations ago; from that time to the

present the product of the MF process has been the most reliable, and hence the "most favored."

Recently the New Method by which terne plates are finished in a manner that gives further protection against corrosion has been combined with the MF process. The result of this combination is the U. S. Eagle N. M. Brand.

You can have the new art booklet, "A Fifty-year Roof," free if you write to W. C. CROXMEYER, Agent, Carnegie Bldg., Pittsburgh, Pa.

The Kelsey Warm Air Generator

Commands special attention as the highest type of heating apparatus. All the good points and none of the defects of others. Simpler and easier of management; more perfect than steam or hot water. No radiators required; can be connected with your present system of flues and registers. Takes the place of two or three hot air heaters. Seventeen thousand satisfied users.

The Old Original Brand

FINE COLORS & STAINS

As the artistic feature of any Architecture depends to a most important degree upon coloring, it is essential, to obtain and retain the desired effects, to select Colors that are Strongest, Purest, Finest, Perfect in Tone and Permanent, of which you may be sure by specifying W. W. & Co's Standard Colors (Monogram Brand).

The beautiful effects to be obtained with Stains upon hard or soft woods is a feature of fine art, which we have studied to make for the trade Stains that are Perfectly Transparent, Clear in Tone and Permanent. It is a specialty in our line that can be of service to you to precisely match samples or to make Stains to conform with some particular conception of coloring. Please correspond on send request for a representative to call.

"MONARCH" SASH CHAINS

The best Sash Chain made. Gives the highest tensile strength. Our chains are blanked with the grain of the metal, insuring full strength of the material and perfect uniformity. Made from a special pure bronze, which is thoroughly non-corrosive. Note shape of the links. They are flattened, making them stronger than the ordinary chain, also prevents substitution. The short semi-circular crown and shape of link forms a truss which makes the "Monarch" chain flexible up to the breaking point. Actual tests show greatest tensile strength. M'f'd by

Perfection Flat Finish

A new varnish that dries with a wax-like, flat finish without the necessity of rubbing. Is superior to a Varnish that requires to be rubbed because it is quicker, cheaper, cleaner, less laborious and more durable. Adds a coat instead of rubbing one away, thus making the work more permanent. Send for sample and price.

SILVER LAKE "A"

For Thirty Years the Standard

A Safe Specification for
SASH CORD

To prevent the substitution of an inferior article we put OUR LABEL ON EVERY HANK, and as an additional protection WE STAMP EVERY THREE FEET OF OUR CORD WITH OUR NAME. If you find Silver Lake "A" Stamped on the cord, it is THE BEST CORD THAT CAN BE MADE.

SILVER LAKE CO.

BOSTON

Send for Samples

SASH CHAINS

“GIANT” and “RED METAL”

Sash Chains are conceded by the Leading Architects to be the Standard, and are specified by them. Our Chains are made from a Special Mixture which cannot be equaled for tensile strength and anti-friction qualities. We are not only the Originators of Sash Chain, but also of the metal from which it is made. Not a pound of this metal was rolled by any mill until we introduced it. Our Chains have been on the market for more than twenty years and have given universal satisfaction.

MOUNTING OF EVERY DESCRIPTION

THE ARCHITECT AND PAINT

The part paint plays in the construction of all kinds of buildings makes it something too important to be slighted by architects. Intelligent architects everywhere recognize this fact and are to-day investigating and studying the paint question more than they ever did before.

LUCAS PAINTS court investigation. They are time tested, strictly high grade paints. They are standard paints that have been manufactured for upwards of half a century and enjoy a wide sale in all sections of the country. Architects who specify them protect their clients and add to their own reputation for doing artistic, thorough work.

Lucas handsome color cards and up-to-date paint literature sent free to architects for the asking. Write to-day.

New York Philadelphia Chicago

WHEELER'S WOOD FILLER

Specified by all leading architects and recognized as the standard for more than 25 years. Brings out the full life and beauty of the wood and forms a permanent foundation for the varnish because its mineral base is transparent and positively non-shrinkable. Most economical filler, as it goes further and saves labor and material. The Bridgeport Wood Finishing Co., New Milford, Conn., New York, Chicago and Philadelphia.

FIVE DISTINCT STYLES OF COOKING RANGES
INCLUDING OUR "B. AND C. KITCHENERS"

These ranges are the heaviest, most substantial and elegant in their general appearance now offered for sale. They are finished with great care and designed for first-class private kitchens or small hotels and restaurants; they have large ovens, plate rack and an open grate adapted for roasting in front. Cast iron backs and jambs, with brass, nickel, bronze or black fronts to order.

A full line of repairs for all French ranges.
